

FEATURES & BENEFITS

- Automatic snow and ice melting controller minimizes operating costs
- Automatic voltage selection operates from 100VAC – 240VAC
- 24VAC model available for hydronic and building automation applications
- Adjustable hold-on time and temperature set point provides flexibility for a wide range of applications
- Rated for up to 3 amp inductive loads for pilot duty applications and resistive loads up to 16 amps
- Weather-resistant NEMA 3R enclosure
- Hold-on timer continues heater operation after snow stops to ensure complete melting
- Sno-Test[™] automatic testing and manual heater cycle for system testing
- Simple four-wire installation
- C-UL-US Listed for Temperature Regulating Equipment

DESCRIPTION

The Snow Switch Model LCD-8 configurable aerial snow melting controller makes automatic snow melting a cost effective alternative in even the smallest applications. Heaters operate at temperatures below the set point, 38°F (3.3°C) default, only when required. The adjustable hold-on period, 3 hours default, continues heater operation after snow stops to ensure complete melting. The LCD-8 controller includes an internal magnetic reed switch used for manual heater cycling, as well as configuring the temperature set point and the hold-on time.

The LCD-8 controller operates from either an automatic selecting

100VAC – 240VAC or from 24VAC. These two voltage options combine with the configurable hold-on time and temperature set point to meet the need of a wide number of applications using just two part numbers.

It controls heater loads up to 16 amps resistive or 3 amps inductive. The operating temperature range extends from –40°F to 140°F (–40°C to 60°C). The redesigned, patent pending, rugged polycarbonate enclosure provides excellent protection at temperature extremes, while allowing snow to shed to prevent iglooming over the moisture sensor.

The internal magnetic reed switch allows for both configuration and manual heater operation without the

need for external switches—which are susceptible to damage—or the need to open the enclosure.

Verifying system functionality after installation or when troubleshooting used to require spray circuit cooler or ice for controller activation. The Sno-Test[™] feature eliminates this need by performing a self-test after power application, and operating heaters in a unique pattern for a few seconds. Reading the test results takes only an AC voltmeter or clamp-on ammeter.

For complete information describing its application, installation and features, please contact Customer Service or visit networketi.com.

SPECIFICATIONS

General

Area of use	Nonhazardous locations
Approvals	 Type 873 Temperature Regulating Equipment

Enclosure

Protection	NEMA 3R
Cover attachment	Polycarbonate with machine screws
Entries	1 x 3/4" entry (bottom)
Material	Polycarbonate
Mounting	Pole mount
Dimensions	4.6" (W) x 6.1" (H) / 117mm (W) x 155mm (H)

Control

Supply voltage	ETI PN 24619: 100VAC – 240VAC; 50/60 Hz ETI PN 24781: 24VAC; 50/60 Hz
Load	3 amp maximum inductive 16 amp maximum resistive
Heater Hold-On timer	0, 1, 3 (default) or 5 hours; configured by magnetic reed switch
Set point temperature	Off (moisture only), 36°F, 38°F (default), 40°F ; configured by magnetic reed switch

Interface

Status indicators	SUPPLY (green): Power on; will flash while in configuration mode HEAT (yellow): Heating cycle in progress
-------------------	--

Wire and Cable Ratings

Power cable	Size for heater load (16 amps maximum)
Heater cable	Size for maximum heater load

Environmental

Operating temperature	–40°F to 104°F (–40°C to 40°C)
Storage temperature	–67°F to 167°F (–55°C to 75°C)

ORDERING INFORMATION

Order Number	Description
24619	LCD-8, 120VAC – 240VAC
24781	LCD-8, 24VAC

LIMITED WARRANTY

ETI's two year limited warranty covering defects in workmanship and materials applies. Contact Customer Service for complete warranty information.
